Art Guard MAP Options for Homes, Galleries and Small Museums

Art Guard MAP sensors can operate in a number of different systems, depending on preferences for installation and alerts.

Option 1. MAP System

The MAP System is in line with home automation conveniences. This is particularly attractive for private residences, but can easily work in galleries and small museums.

- Sensors, wireless alarms and any other peripherals are pre-enrolled in the Helix panel so the System is self-contained and plug-and-play ready.
- The System functions on multiple communication platforms. It can be plugged directly into a router for IP. GSM and/or CDMA cellular can be primary or secondary communications. Adding a Wi-Fi card is a 3rd option.
- Capacity for 96 zone and eight wireless alarms.
- Attractive panel can be located anywhere for maximum flexibility.
- System managed through interface or app from a computer or mobile device.
- Alerts customized to include alarms, texts, emails and calls to multiple parties.
- **Cost:** Panel - \$350 with GSM card. MAP sensors with magnets - \$129 ea. Repeater - \$90. IP/Wi-Fi camera - \$108. Data only monitoring (texts/emails) for \$14.95/mo. Full monitoring (texts/emails/phone calls) for \$21.95/mo.

Option 2. MAP sensors with conventional security panel/systems

MAP can communicate directly with DSC panels/receivers or translate to Honeywell, Ademco, GE/Interlogix, 2GIG or Qolsys control panels.

- Panel set up and sensor enrollment by a qualified security system installer.
- Minimum 64 zone capacity (DSC) to over 200 (Honeywell).
- Choice of local alarm and/or central station monitoring.
- **Cost:** Set by installer for sensors, equipment, installation and monitoring.

Option 3. Sensors pre-enrolled in standard 64-zone DSC Impassa security panel

A stand-alone panel shipped with sensors pre-enrolled is an option in situations where IP is not available and monitoring is not required.

- Self installed with option to add monitoring at a later date.
- Options for several local alarms, including panel beeps, small Piezo alarm wired to the panel or wireless alarms.
- Maximum flexibility. Can be moved within the facility or travel with a show.
- **Cost:** Panel - \$250. Pre-enrolled sensors - \$129 ea. with magnets. Piezo alarm - \$15. Wireless siren - \$70. Repeater - \$80.
- Central station monitoring can be added by security installer.

Regardless of the option, application of the MAP sensors and magnets on the art should be done by a qualified art handler.
